Professional Summary

I write code to solve human problems. Recently graduated with a degree in Mathematics, I bridge mathematical rigor with practical software engineering to build scalable, user-centric tools. Whether developing an automated reporting platform, a mobile-first health screening app, or an educational management system, my focus is always on reducing friction and delivering measurable business impact. I lean on solid architectures (Laravel, Next.js, PostgreSQL) to get the job done, but technology always comes second to the user's needs. Beyond engineering, I actively mentor aspiring developers, bringing strong communication and empathy to every team I collaborate with.

Professional Experience

Web Application Developer / System Development (Full-time) *Sep 2026 – Present*
PT Semen Indonesia Logistik (SILOG)
Develop and maintain Laravel/Filament-based internal and operational web applications, troubleshoot production bugs, and support deployment, cloud, and DevOps workflows alongside the ICT team.

Web Application Developer / System Development (Full-time) *Sep 2026 – Present*
PT Semen Indonesia Logistik (SILOG)
Develop and maintain Laravel/Filament-based internal and operational web applications, troubleshoot production bugs, and support deployment, cloud, and DevOps workflows alongside the ICT team.

Freelance Software Engineer *Feb 2026 – Present*
NechCode – Digital Solutions Agency
Partner directly with MSMEs, educational institutions, and healthcare clients to translate messy workflows into clean, functional digital platforms. Manage end-to-end technical delivery–from database schema design to frontend usability–bridging the gap between business goals and robust software engineering.

Part-time Programming Teacher *Jan 2025 – Present*
Timedoor Academy
Break down complex computer science concepts into fun, digestible lessons for junior and teen students. Guide learners through debugging struggles and introduce basic AI and computer-vision (NumPy, OpenCV) in a supportive environment, fostering confidence and logical problem-solving skills.

Fullstack Developer Intern *Jan 2025 – Feb 2025*
SMA IT Al Uswah Surabaya
Listened to the frustrations of school administrators regarding manual data entry and engineered a digital attendance management system. Handled the full lifecycle from requirements gathering to final user acceptance testing, delivering a reliable Laravel backend that immediately replaced tedious paperwork.

Coordinator Assistant Laboratory *Aug 2024 – Dec 2025*
ITS Mathematics Department (Programming & Visual Computing)
Spearhead operational management for programming practicums and manage a team of assistants. Sit side-by-step with over 100 junior students to bridge the gap between confusing algorithm theory and satisfying practical software development (Java, Python), ensuring no student is left behind.

Selected Projects

SIDEDIKK – Health-Tech & Screening Platforms *2026*
Fullstack Developer | Next.js, Laravel, Tailwind CSS, PWA, Chart.js
Empowered users with accessible health education and risk detection. Developed a mobile-first pregnancy screening PWA that translates complex health data into clear, understandable risk classifications, and a prenatal education platform featuring AI-assisted conversational learning.
View Repository / Demo

Portal TPQ – Education Management Portal *2026*
Fullstack Developer | Laravel 12, PHP 8.2, MySQL, Tailwind CSS
Streamlined administrative bottlenecks for Islamic educational centers. Digitized student progress, teacher schedules, and automated reporting workflows into a unified dashboard, allowing educators to focus on teaching rather than administrative paperwork.

View Repository / Demo

erapor – Automated Reporting System *2025*
Fullstack Developer | Next.js, TypeScript, MongoDB, NextAuth, PDF / Excel export
Eliminated hundreds of hours of manual administrative work by automating organizational reporting and document generation. Built role-based dashboards that centralized data access, allowing leadership to track compliance and teams to generate multi-format reports effortlessly.
View Repository / Demo

HISurabaya – GIS Spatial Search Platform *2025*
Fullstack Developer | Laravel 12, PHP 8.2, SQL Server, Leaflet, Turf.js
Enhanced the tourism experience by transforming standard text searches into an interactive spatial discovery tool. Leveraged mapping technologies to allow users to visually explore accommodations based on routes and specific city zones.
View Repository / Demo

Education

Bachelor of Mathematics *2022 – 2026*
Institut Teknologi Sepuluh Nopember (ITS), Surabaya
GPA: 3.40 / 4.00 | Learned how to break down massive problems into logical, solvable steps. My undergraduate thesis focused on optimizing how we pull data from massive databases, utilizing a PROADAPT-based memory-aware partitioning mechanism on PostgreSQL/TimescaleDB for 50M+ rows of time-series data, proving capability in complex, under-the-hood optimization.

Leadership & Community

Leader of Mathematics 2022 (STI 57) *May 2023 – Present*
Institut Teknologi Sepuluh Nopember
Elected to facilitate communication and coordination among 150+ peers. Focused on building a supportive academic environment, contributing to a 20% increase in active participation within departmental activities.

1st Vice Head of Sentrum Katalis *Feb 2025 – Dec 2025*
HIMATIKA ITS
Directed internal governance and spearheaded digital transformation initiatives for a 150+ member organization. Acted as a communication bridge, focusing on maintaining a cohesive community and actively reducing committee burnout through process automation.

Workshop Facilitator & Technical Speaker *Jul 2024 – Nov 2025*
Various Campus Organizations (HIMATIKA, LKKI, UKM Rebana)
Delivered multiple workshops on fundamental web development, human resource management, and team leadership. Translated complex concepts into actionable skills for over 100+ total participants across different events.

Head of Regeneration Department *Jan 2024 – Dec 2024*
LKKI Matematika ITS
Led human resource development and member training programs. Designed and executed engagement strategies focused on personal growth and empathy, which resulted in a 30% improvement in active student participation.

Technical Arsenal

Core Languages:	TypeScript, JavaScript, PHP, Python, SQL, Java, HTML/CSS
Frontend:	Next.js, React, Vue.js, Tailwind CSS, Alpine.js, Blade, Bootstrap
Backend & Data:	Laravel, Node.js, PostgreSQL, MySQL, SQL Server, MongoDB, PostGIS, Firebase, Appwrite
Architecture:	REST API Design, Role-Based Access Control, Authentication (Sanctum, NextAuth), Web GIS
Tools & Workflow:	Git, Docker, Linux, Laravel Filament, Vercel, Cloudinary, Composer, npm, Vite, Google Sheets API, NumPy, OpenCV
Soft Skills:	Technical Communication, Mentorship, Requirement Gathering, Problem Solving
