Professional Summary

Final-year Mathematics student at ITS focusing on **Database Optimization** and **System Integrity**. Proven track record in developing fault-tolerant information systems for educational and government sectors, specifically addressing **data inconsistency** and **input validation errors**. Currently conducting advanced research (PROADAPT) on distributed query optimization, highly relevant to modern logistics data architecture. Seeking to leverage backend expertise (Laravel/Go/SQL) to assist PGN in modernizing legacy infrastructures and ensuring high-availability data operations.

Education

Bachelor of Mathematics (Focus: Computational Mathematics)

2022 – Present

Institut Teknologi Sepuluh Nopember (ITS), Surabaya

Current GPA: [Your GPA] | Thesis: "PROADAPT: Query Optimization in Distributed Databases using Apache Spark SQL"

Selected Projects & Research

PROADAPT (Thesis Research)

Nov 2025 – Present

Researcher & Data Architect / Tech: Apache Spark, Python, SQL

Conducting research on query plan optimization for distributed database systems. Focused on reducing latency in massive data retrieval—directly applicable to handling high-volume logistics and telemetry data (IoT) for energy distribution pipelines.

SI-BPS & SI-PRESENSI (System Modernization)

Jan 2025 – Dec 2025

Lead Backend Developer / Tech: Laravel, MySQL, Alpine.js

Engineered a robust internal system for student and employee tracking.

- **Solved Data Corruption:** Implemented strict server-side input validation and data sanitization layers to prevent system crashes caused by user formatting errors (e.g., trailing spaces, invalid characters).
- **Logic Optimization:** Designed a relational schema to handle complex "Credit Point" calculations automatically, replacing error-prone manual spreadsheet methods.

Patahero API (Production REST API)

Jan 2026

Backend Engineer / Tech: Laravel 12, PHP 8.2, MySQL, Laravel Sanctum

Built a production RESTful API backend for PataHero, a mobile first aid application. Focused on creating standardized, structured data endpoints for fracture treatment steps, ensuring seamless communication between the mobile app and server. Implemented token-based auth (Sanctum) and file upload handling. Deployed to shared hosting with a seeded production database.

Professional Experience

Founder & Lead Developer

Jan 2026 – Present

MulyOS — Freelance Digital Agency

- Founded MulyOS, a digital agency delivering full-stack web applications for UMKM and the academic community using Next.js/React.
- Delivered client platforms: NestBloom, Premom, Thyva, Soulmom (live on Vercel); Real Keke (in progress).
- Managed full project lifecycle: requirements, architecture, development, and deployment for each client.

Assistant Laboratory Coordinator (Programming & Visual Computing)

2024 – Present

ProviKom Lab, ITS Mathematics Department

- Managing database practicum modules for junior students, focusing on SQL efficiency and normalization standards (3NF).
- Troubleshooting code and logic errors for 50+ students weekly, sharpening debugging skills for legacy codebases.

Fullstack Developer Intern

May 2025

SMA IT Al Uswah Surabaya

Deployed a digitized attendance and performance system. Conducted User Acceptance Testing (UAT) with non-technical staff to ensure the interface was "error-proof" and easy to navigate for users with low tech-literacy.

Programming Instructor

Jan 2025 – Present

Timedoor Academy

Teaching algorithmic thinking and coding fundamentals. honed communication skills to explain complex technical concepts (like logic errors and database structures) to non-technical audiences.

Technical Skills

Backend & Database: Laravel (Expert), Go (Intermediate), MySQL, PostgreSQL, MongoDB, Apache Spark, SQL Tuning, ERD Design, Database Normalization.
System Integrity: Input Validation (Server/Client), Error Handling, API Design (REST), Data Sanitization.
Frontend & Tools: Next.js, Tailwind CSS, Docker, Git (Version Control), Linux Environment.

Leadership

1st Vice Head

Feb 2025 – Present

HIMATIKA ITS (Mathematics Student Association)

Led organizational transformation and staff performance management for 100+ members. Standardized internal reporting workflows to increase administrative efficiency.
