Huawei Recruitment Team

Subject: Application for Campus Hiring / FGDP Opportunity

Dear Huawei Recruitment Team,

I am writing to express my interest in Huawei's campus hiring opportunity, with primary interest in Software Engineer and other technology-driven entry-level roles aligned with software development and operational support. I am a final-year Mathematics student at Institut Teknologi Sepuluh Nopember (ITS) with hands-on experience building full-stack software products for education, reporting, GIS, and health-tech use cases.

Through academic, organizational, and freelance work, I have been directly involved in turning requirements into working systems. My recent work includes *erapor*, an automated reporting platform with role-based dashboards and export workflows; *ELKPD*, a production-ready learning platform for a real client; *patahero_api*, a Laravel-based REST API backend for a mobile application; and *keke-pwa*, a mobile-first incident reporting platform with admin communication and status tracking. These projects strengthened my skills in TypeScript, Next.js, Laravel, PHP, SQL, authentication, debugging, and deployment.

In addition to project execution, I also teach programming and web development at Timedoor Academy and support practicum activities in the ITS Mathematics Department. These responsibilities strengthened my communication, technical discipline, and ability to learn quickly in structured environments. As an ITS student, I also followed Huawei's campus hiring engagement at Bursa Karir ITS 46, which further increased my interest in contributing to Huawei through practical software engineering work.

I believe my background fits best with software-oriented roles where analytical thinking, implementation discipline, and adaptability are important. I would welcome the opportunity to contribute and continue growing in Huawei's fast-paced environment.

Thank you for your time and consideration. I have attached my CV for review and would be glad to discuss my background further.

Sincerely,

Hafidz Mulia
