Professional Summary

Full-stack developer with hands-on experience building and deploying web applications across internal tools, reporting systems, education platforms, health-tech products, and API-backed services. Strong in JavaScript, TypeScript, Next.js, React, Laravel, PHP, SQL, REST API design, database modeling, authentication, and production deployment. Built real projects with third-party integrations such as Google OAuth, Google Sheets API, Cloudinary, Firebase, Appwrite, and chatbot APIs, while handling client requirements, debugging workflows, and direct delivery. Comfortable working remotely, using terminal-based development workflows, and collaborating in English for technical communication.

Core Skills

Languages: JavaScript, TypeScript, PHP, SQL, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, Blade, Alpine.js, Bootstrap, Leaflet.js
Backend & APIs: Node.js runtime, Next.js API Routes, Laravel, REST APIs, OAuth, JWT, Laravel Sanctum, NextAuth.js, Google Sheets API, Cloudinary, Firebase integrations
Databases: PostgreSQL, MySQL, MongoDB, Microsoft SQL Server, PostGIS, Firebase Firestore, Appwrite
Tools: Git, GitHub, npm, Composer, Vercel, Postman, CLI workflows, AI-assisted development tools
Strengths: API integration, third-party service consumption, CRUD systems, admin dashboards, debugging, schema design, responsive frontend implementation, documentation, remote collaboration

Professional Experience

Founder & Lead Developer, NechCode 2026 – Present
Freelance Digital Agency

- Build and deliver full-stack web applications for UMKM, academic, and research clients using Next.js, TypeScript, Laravel, PHP, and SQL-based databases.
- Handle end-to-end delivery: requirement gathering, solution design, database modeling, implementation, debugging, deployment, and iteration.
- Implement third-party integrations across projects, including Google Sheets API, Cloudinary, Firebase services, Appwrite, Google OAuth, and chatbot APIs.
- Maintain production systems such as PREMOM, THYVA, SOULMOM, REAL KEKE, and Nestbloom, including admin workflows, gated user flows, and reporting features.

Programming and Web Development Instructor, Timedoor Academy Jan 2025 – Present

- Teach programming fundamentals, web development basics, and debugging practice to junior learners through project-based instruction.
- Communicate technical concepts clearly and guide learners through implementation issues, logic mistakes, and code review feedback.

Assistant Laboratory Coordinator, ITS Mathematics Department 2024 – Dec 2025

- Support programming and visual computing practicum activities, including mentoring junior students in algorithms, debugging, and software fundamentals.
- Help maintain practicum materials and coordinate learning workflows in a technical academic environment.

Full-Stack Developer Intern, SMA IT Al Uswah Surabaya May 2025

- Developed and delivered a Laravel-based attendance system, from requirement gathering and schema

design through implementation and user acceptance testing.

Selected Projects

PREMOM / THYVA / SOULMOM 2026
Next.js, TypeScript, Appwrite, Firebase, Google Sheets API, Coze API

- Built health-tech and education platforms with authentication, gated content and test flows, chatbot integration, data logging, and admin-facing management features.
- Worked with third-party integrations and external services including Coze API, Google Sheets API, Firebase, and Appwrite for real client-facing products.

Patahero API 2026
Laravel 12, PHP 8.2, MySQL, Sanctum

- Built a RESTful backend for a mobile first-aid application with structured endpoints, token-based authentication, profile management, and image upload handling.
- Focused on API structure, data modeling, and backend reliability for app consumption.

Rapor HIMATIKA 2025
Next.js, TypeScript, MongoDB, NextAuth, PDF/Excel export

- Developed a reporting platform with role-based dashboards, centralized report management, and export workflows for internal operations.
- Built production features around authentication, admin workflows, and document generation.

HISurabaya 2025
Laravel 12, PHP 8.2, SQL Server, Leaflet, Turf.js

- Built a GIS-based hotel information system with point, route, and area search modes, combining Laravel, SQL Server, and browser-side mapping workflows.

Sina 2025
Laravel 12, MySQL, Tailwind CSS, Alpine.js, Cloudinary

- Developed a storybook content platform with reading progress tracking, role-based access control, content management, and production-ready media delivery.

Education

Bachelor of Mathematics, Institut Teknologi Sepuluh Nopember (ITS) 2022 – Present
GPA: 3.36 / 4.00
Focus: Computational Mathematics and Informatics
Thesis: Improved data warehouse query performance using a PROADAPT-based memory-aware partitioning mechanism on PostgreSQL and TimescaleDB for 50M+ row time-series data

Additional Information

English: Professional working proficiency for technical reading, writing, and conversation
Work Style: Comfortable with remote work, terminal-based workflows, documentation, code review, and night-shift collaboration for global teams
