Profile

Final-year Mathematics student at Institut Teknologi Sepuluh Nopember with a focus on computational mathematics and strong interest in programming and visual computing. I use technology to turn real user and workflow problems into usable digital products across education, health, GIS, and operational contexts, with strengths in product thinking, execution, teaching, and leadership.

Education

Bachelor of Mathematics *2022 – 2026*
Institut Teknologi Sepuluh Nopember (ITS), Surabaya
GPA: 3.36 / 4.00. Focus: Computational Mathematics and Informatics. Thesis work explores PostgreSQL and TimescaleDB query-performance optimization on 50M+ row time-series data.

Professional Experience

Founder and Lead Developer *2026 – Present*
NechCode.id / Independent Client and Research Projects
Lead end-to-end delivery for client and research-oriented digital products, covering requirements, product scope, database design, frontend and backend development, deployment, debugging, and post-release iteration.

Assistant Laboratory Coordinator *2024 – Dec 2025*
PROVIKOM Laboratory, ITS Mathematics Department
Coordinate and support practicum activities in algorithms, programming, and visual computing. Mentor students in problem solving, debugging, and structured technical learning with the laboratory assistant team.

Programming and Web Development Instructor *Jan 2025 – Present*
Timedoor Academy
Teach programming fundamentals, algorithmic thinking, introductory web development, and selected Python-based AI or computer-vision modules. Guide students through debugging, project practice, and technical explanation.

Leadership Experience

1st Vice Head *Feb 2025 – Dec 2025*
HIMATIKA ITS
Monitored cabinet performance, supported cross-division execution, and helped keep internal programs, reporting discipline, and team coordination aligned with shared organizational goals.

Leader of Mathematics 2022 / STI 57 *May 2023 – Present*
Mathematics 2022 Cohort
Facilitated communication and coordination across 150+ students, helping improve participation, information flow, and peer connection throughout the cohort.

Selected Projects

mainbipa.id - Indonesian Language Learning Platform *2026*
Product Builder | Learning Flow, Content Structure, User Experience
Built a BIPA-focused learning platform for real educational use, with structured modules, guided practice, and learner-friendly interaction patterns for non-native Indonesian learners.
Project Link

ArahBelajar - Adaptive Learning Platform *2026*
Full-Stack Developer | Next.js, React, TypeScript, Firebase, Google Sheets API
Built an adaptive learning platform with pretest, tryout, recommendation, scaffolding, posttest, and dashboard flows, turning a research-driven learning model into a usable product for day-to-day academic workflows.
Project Link

REAL KEKE - Workplace Safety Incident Reporting *2026*
Full-Stack Developer | Next.js, React, TypeScript, Firebase, Cloudinary, PWA
Developed a mobile-first K3 incident reporting workflow with role-based access, media upload, status tracking, comment threads, and push notifications for operational communication and follow-up.
Project Link

SMARTBALITA - Child-Focused Mobile App *2026*

Mobile App Developer | React Native, Mobile UI Flow, Research Support Workflow

Built a React Native mobile application with structured user flows and practical mobile interaction design for real child-focused support scenarios.

erapor - Automated Reporting System *2025*

Full-Stack Developer | Next.js, React, TypeScript, MongoDB, NextAuth

Created a reporting platform with role-based dashboards, user management, and PDF/Excel exports to reduce manual internal reporting work through a more centralized and sustainable workflow.

Project Link

Skills

Product & Leadership	Requirement discovery, MVP scoping, team coordination, mentoring, technical communication, iterative delivery
Frontend	React, React Native, Next.js, TypeScript, Tailwind CSS, responsive UI, form validation, dashboard UX
Backend & Data	Laravel, PHP, Next.js API Routes, REST API, MySQL, PostgreSQL, PostGIS, MongoDB, Firebase, Appwrite
Tools	Git, GitHub, Vercel, Cloudinary, Google Sheets API, Firebase Cloud Messaging, Composer, npm
Languages	Indonesian (native), English (professional reading and writing)
