Professional Summary

Mathematics graduate from ITS focused on building internal tools that make office work easier. I help teams replace manual data entry with digital forms, automated Excel reports, and clean dashboards. I prioritize understanding user needs and creating simple, reliable solutions over unnecessary technical complexity, ensuring non-technical staff can do their jobs faster and better.

Education

Bachelor of Mathematics *2022 – Present*
Institut Teknologi Sepuluh Nopember (ITS), Surabaya
GPA: 3.40 / 4.00 | Focus: Computational Mathematics and Informatics

Selected Projects

erapor — Automated Reporting System *2025*
Fullstack Developer | Next.js, MongoDB, NextAuth
A platform that replaces manual data typing with a clean digital dashboard. It allows users to manage records easily and download bulk reports into Excel (CSV) and PDF files with one click.
View Repository / Demo

soulmom-web — Data Logging System *2026*
Fullstack Developer | Next.js, Firebase, Google Sheets API
A digital screening form that automatically saves responses directly into Google Sheets. Built to help administrative teams monitor incoming data in real-time without doing manual copy-pasting.
View Repository / Demo

sidedikk — Internal Information System *2026*
Fullstack Developer | Laravel 12, MySQL, Blade
A secure central dashboard built to manage user data and daily office operations. Designed to keep administrative records neat, safe, and easy to access for non-technical staff.
View Repository / Demo

SIPerpustakaan — Data & Analytics Dashboard *2025*
Fullstack Developer | Laravel 12, MySQL, Tailwind CSS
A library management system that automatically calculates late fees and shows data analytics. Built with a very clean interface so that anyone can manage the records easily and safely.
View Repository / Demo

Professional Experience

Freelance Software Engineer *Feb 2026 – Present*
NechCode
Helped clients and project teams move away from manual paperwork by building custom digital tools. Created web systems that connect directly to Google Sheets, making data entry and daily tasks much faster and fully automated.

Programming Teacher *Jan 2025 – Present*
Timedoor Academy
Taught programming to beginners and non-technical students. This experience taught me how to explain technical problems simply and patiently, which directly helps me provide clear and friendly IT support to coworkers.

1st Vice Head (Digitalization Lead) *Feb 2025 – Dec 2025*
HIMATIKA ITS
Noticed that managing data for 150+ members took too much time, so I built 'Rapor HIMATIKA'. This system automated data collection and automatically generated PDF and Excel reports, saving the team 60% of their usual administrative time.

Fullstack Developer Intern *May 2025*
SMA IT Al Uswah Surabaya

Worked closely with school staff to understand their daily administrative challenges. Built a simple, secure attendance and student management system that met their exact needs and was easy for them to use everyday.

Technical Skills

Fundamentals:	Problem Solving, Product Thinking, IT Support, System Documentation
Data & Automation:	Google Sheets API, Automated PDF/CSV Exports, Relational Databases
Backend & DB:	Laravel, MySQL, PostgreSQL, SQL Server, MongoDB, REST API
Frontend:	Next.js, React, Blade, Tailwind CSS, Alpine.js
Languages:	PHP, TypeScript, JavaScript, SQL, Python, HTML, CSS

Additional Information

Domicile:	Surabaya
Language:	Indonesian (native), English (professional working proficiency)
