Hiring Manager
[Company Name]

Re: Application for [Position Title]

Dear Hiring Manager,

I am writing to express my strong interest in the [Position Title] position at [Company Name]. As a recent Electrical Engineering graduate from Telkom University (GPA 3.24/4.00) with hands-on experience in electronics laboratory operations, semiconductor research, instrumentation, hardware integration, and technical data processing, I am confident that my technical background and collaborative mindset would allow me to contribute meaningfully to your team.

During my studies, I developed a strong foundation in electronics, instrumentation, hardware integration, and technical data analysis. Through my roles in the Faculty of Electrical Engineering Electronics Laboratory, I supported electronics research, practical laboratory activities, equipment preparation, hardware troubleshooting, and technical documentation, while also coordinating practicum preparation, member schedules, and laboratory readiness. Beyond the laboratory, I developed and characterized an organic photomultiplication detector for ultraviolet light in the 300-400 nm range and worked on a two-wheel balancing robot project involving ESP32, PID control, hardware integration, and control systems, strengthening both my technical capabilities and my ability to collaborate effectively in engineering projects.

My internship experience has further grounded this technical foundation in an international research environment. As an Engineer Research Intern at Ming Chi University of Technology's Organic Electronics Research Center in Taiwan, I gained hands-on exposure to semiconductor and organic electronics research while collaborating with international supervisors and researchers to discuss experimental findings, resolve technical issues, and maintain clear technical documentation. This experience taught me to work carefully in structured laboratory environments, interpret technical and measurement data accurately, and adapt quickly to new equipment, research methods, and engineering challenges.

I am a fast learner who genuinely enjoys exploring new technologies, and I thrive in collaborative, cross-functional teams. I would welcome the opportunity to bring my skills in electronics, instrumentation, hardware integration, semiconductor research, and technical data processing to [Company Name], while continuing to develop professionally within your organization. Thank you for considering my application; I would be glad to discuss how my background and experience can contribute to your team in an interview.

Sincerely,

Sulaiman Hadi Hibatullah
