Professional Summary

Detail-oriented and customer-oriented IT professional passionate about helping customers succeed in utilizing enterprise software. Proven ability to coordinate closely with Project Managers, Developers, and QA Engineers to investigate and resolve customer issues. Strong sense of ownership in maintaining accurate documentation of customer interactions, issue investigations, and resolutions. A continuous learner with a calm-under-pressure mindset, delivering professional, responsive, and solution-oriented customer support while expanding understanding of complex business processes.

Education

Bachelor of Mathematics (Programming and Visual Computing) *2022 – 2026*
Institut Teknologi Sepuluh Nopember (ITS), Surabaya
GPA: 3.40 / 4.00 | Focus: Computational Logic, Data Architecture, and Strong Analytical Problem Solving

Professional Experience

Founder & Technical Coordinator *Feb 2026 – Present*
Mulyos Project (B2B Digital Solution Agency)
Build trusted relationships with enterprise (B2B) customers by translating business needs into technical requirements. Manage customer expectations throughout the support process, communicate customer-reported problems clearly and accurately to the engineering team, and validate proposed solutions before communicating them back to customers in a clear and customer-friendly manner.

1st Vice Head (Digitalization & IT Support) *Feb 2025 – Dec 2025*
HIMATIKA ITS
Managed technical support for internal applications serving 150+ users. Identified recurring issues and shared improvement opportunities with internal teams. Participated in knowledge-sharing and process improvement initiatives, escalating critical issues appropriately while ensuring effective communication across all stakeholders. Reduced manual administrative time by 60%.

Programming Teacher (Technical Communicator) *Jan 2025 – Present*
Timedoor Academy
Utilize strong listening and problem-solving abilities to explain logical programming concepts. Able to manage multiple priorities in a fast-paced environment, demonstrating excellent communication and customer service skills to students and parents while ensuring high satisfaction.

Application Support Intern *May 2025*
SMA IT Al Uswah Surabaya
Delivered hands-on support for the rollout of an internal digital system. Maintained basic documentation of user errors, performed root-cause analysis on data discrepancies, and provided outstanding enterprise customer support by acting proactively and maintaining a highly organized issue log.

Relevant Technical Exposure

keke-pwa — Incident Management System *2026*
Technical Lead | Next.js, Firebase, Issue Tracking
Developed a secure incident reporting PWA tailored for workplace safety. Simulated enterprise ticketing workflows (similar to Jira logic) by implementing role-based access, automated notifications, and threaded resolutions, ensuring tickets contain sufficient information for investigation.
View Repository / Demo

Mainbipa — Educational Web Platform *2026*
Application Support & Developer | Next.js, Tailwind CSS
Translated the client's business processes into a structured digital workflow. Facilitated continuous improvement by gathering user feedback during the draft phase, troubleshooting reported bugs, and communicating technical information in a customer-friendly manner until project approval.
View Repository / Demo **erapor — Master Data Management (MDM) Dashboard** *2025*

Database & App Support | MongoDB, NextAuth
Built a centralized reporting dashboard managing relational data for 70+ committees. Gained practical exposure to Master Data Management (MDM) and operational business logic, managing accurate and immutable records for future reference.
View Repository / Demo

Abila Company — B2B Digital Identity & Admin System *2024*
IT Solutions Partner | HTML, TypeScript, UI/UX Revisions
Delivered a tailored web solution for a B2B/UMKM client. Actively listened to the client's business identity needs, maintained accurate documentation of requested changes, and provided responsive application support throughout the development and deployment phases.
