Hiring Team
PT Sosial Bisnis Indonesia (SOBI)

Subject: Application for Junior Web Developer

Dear Hiring Team,

I am writing to apply for the Junior Web Developer position at SOBI. I am a web developer with hands-on experience building and deploying full-stack web applications, especially with Laravel, PHP, MySQL, JavaScript, and responsive frontend implementation. What makes this opportunity especially meaningful to me is that SOBI combines technology work with real operational and social impact, which is the kind of environment where I want to grow.

In my recent projects, I have worked on both backend and frontend development. My Laravel-based work includes systems such as *sina*, a role-based storybook platform with admin CMS and reading progress tracking; *SIPerpustakaan*, a workflow-heavy library management system with lending and analytics; and *patahero_api*, a RESTful backend with authenticated endpoints and structured resource handling. Through these projects, I have gained practical experience in relational database design, Eloquent-based backend workflows, authentication and authorization, API integration, debugging, and production-oriented maintenance.

Although most of my strongest production work has been in Laravel, I also have direct exposure to Vue.js through my *vue-tasty-recipes* project and broader experience with component-based frontend development. Because my foundation in PHP MVC applications is already strong, I am confident I can adapt quickly to CodeIgniter-based systems as well. On the deployment side, I have handled live releases, production configuration, and custom domain setup for multiple web projects. I also work comfortably in independent and remote settings, which fits SOBI's contract and remote setup well.

I believe I can contribute to SOBI by building and maintaining reliable web-based systems, supporting API-driven features, and keeping the implementation practical, clean, and user-focused. I would value the opportunity to contribute my technical skills while continuing to learn from a team working at the intersection of technology, communities, and regenerative impact.

Thank you for your time and consideration. I have attached my CV and would be glad to discuss how my background can support SOBI's web development needs.

Sincerely,

Hafidz Mulia
