Professional Summary

Web developer with hands-on experience building and deploying full-stack applications using Laravel, PHP, MySQL, JavaScript, and responsive frontend workflows, with additional exposure to Vue.js and component-based UI development. Delivered live systems across education, reporting, GIS, and content platforms, covering backend logic, relational database design, authentication, REST APIs, deployment, and iteration. Comfortable working independently in remote settings and writing maintainable, user-focused web applications.

Relevant Experience

Founder & Lead Developer

2026 – Present

NechCode — Freelance Digital Agency

Lead end-to-end delivery for web projects, including requirement breakdown, backend and frontend implementation, database modeling, deployment, bug fixing, and feature iteration. Worked on live products for education, research, and operational use cases with a strong focus on practical and maintainable solutions.

Programming and Web Development Instructor

Jan 2025 – Present

Timedoor Academy

Teach programming fundamentals, web development basics, debugging, and structured problem solving. This role strengthened my communication, documentation, and ability to explain technical issues clearly.

Fullstack Developer Intern

May 2025

SMA IT Al Uswah Surabaya

Developed and delivered a Laravel-based attendance system from requirement gathering to implementation and user testing, giving me practical experience in PHP web development for a real institution.

Selected Projects

sina — Children's Storybook Platform

2025

Fullstack Developer / Laravel 12, PHP 8.2, MySQL, Blade, Tailwind CSS, Alpine.js

Built a responsive content platform with reading progress tracking, role-based access control, media management, and admin CMS. Handled application logic, Eloquent-based data relationships, and production deployment for a live public release.

SIPerpustakaan — Library Management System

2025

Fullstack Developer / Laravel 12, PHP 8.2, MySQL, Eloquent, Blade, Tailwind CSS

Developed a workflow-driven web system for books, students, lending, overdue fines, and analytics. This project strengthened my experience in CRUD-heavy business logic, relational database design, and maintainable backend structure.

patahero_api — REST API Backend

2026

Backend Developer / Laravel 12, PHP 8.2, MySQL, Sanctum

Built a RESTful backend for a mobile first-aid application, including authenticated endpoints, profile management, structured resource handling, and image upload support. This project is my strongest proof of API-focused Laravel development.

vue-tasty-recipes — Vue.js Frontend Practice Project

2025

Frontend Developer / Vue.js, JavaScript, responsive UI

Built a small Vue.js web project focused on component-based frontend structure and responsive interface implementation. It serves as direct proof that I have worked with Vue.js in addition to my larger Laravel-based projects.

Technical Skills

Languages:	PHP, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks:	Laravel, Vue.js, Next.js, Blade, Alpine.js, Tailwind CSS, Bootstrap
Backend:	REST API development, Eloquent ORM, authentication and authorization, CRUD systems, admin dashboards
Databases:	MySQL, PostgreSQL, SQL Server, MongoDB, Firebase Firestore, Appwrite
Deployment & Tools:	Git, GitHub, Composer, npm, Vite, Vercel, Cloudinary, shared hosting deployment, custom domain setup
Working Style:	Debugging, cross-functional collaboration, documentation, remote work discipline, self-management
Languages:	Indonesian (native), English (professional working proficiency for technical reading and writing)

Education

Bachelor of Mathematics	<i>2022 – Present</i>
<i>Institut Teknologi Sepuluh Nopember (ITS), Surabaya</i>	
Focus on computational mathematics and informatics, with strong exposure to programming, databases, and applied software development. GPA: 3.36 / 4.00.
